

## **Conversation with Bucky, #1 “Precession and Skateboarding”**

### **OPEN: Segment of Bucky talking about “Precession”**

Tape: Precession #1a

“Precession is.....

### **CUT to segments of Albie on the Half pipe**

Albie in voice over recites the following narration:

Precession allows me to do tricks on my skate board without falling off

According to Bucky;

“Precession is the effect of any body in motion upon any other body in motion and the closer the proximity the more powerful the effect. For example, the sun’s pull on the Earth induces its orbiting in a course around the Sun at 90 degrees to the gravitational pull; that is, the effect on the other body is always produced as an angular re-direction other than a 180 degrees direction towards or away from one another.”

“Precession allows a spinning top to lean over sideways without tipping further.

“Precession enables the gyro-compass hold its true north orientation without magnets and despite the ships changes in course”

Precession enables me to do tricks by applying pressure at a 90 degree to the movement of my skateboard

### **Tape cuts to more Albie on Skateboard:**

Skating to the music of “Master Thesis” in the background, The music starts very low and increases till it hits the line “They burned incenses in a Buck Minster Fuller like Dome”

Then it fades after the line “but I took it as the perfect opportunity to grow”
